HardiePlank® weatherboards in a combination of vertical hit and miss and horizontal overlap look - Colours: Boothbay Blue and Arctic White

HardiePlank® VL cladding installed horizontally - Colour: Anthracite Grey

HardiePlank® VL cladding installed horizontally - Colour: Arctic White

Before After

This stunning refurbishment saw an extension and new build garage block transformed with render and Soft Green **HardiePlank**[®] weatherboard, brought together to create an elegant countryside retreat.

The property, located near Galleywood Common in Chelmsford, was originally a self-build home constructed in the 1960s. Over time, the house aged badly and the owners decided a full refurbishment was due.

Before

Hyland Homes was commissioned to overhaul the property through construction of a large extension and detached garage block. The end result is a complete transformation into what is now a highly desirable, classically designed home.

After

” **HardiePlank®** is our ‘go to’ recommendation for any homeowner wanting a classic facade that endures.

Premium Stockist

” Mixing traditional with modern was key to our design and so we quickly switched to **HardiePlank® VL** for the crisp, clean lines to contrast with the exposed stone.

Private Homeowner

Traditional home in Harrogate was extended at the rear with a new double-storey extension and contrasting tongue and groove **HardiePlank® VL** weatherboard on the upper level.

The homeowner chose **HardiePlank® VL** boards for its' fresh, symmetrical look and low maintenance properties.

Here Anthracite Grey in cedar complements the local stone to offer a strong contrast. The end result is a striking renovation that beautifully captures the character of the home's local heritage.

Resistant Durable

Have your heart set on wood but unsure on the on-going heavy maintenance? **HardiePlank®** family weatherboards just might be the solution for you.

HardiePlank® family

Wood

+ Durable

Thanks to its special yet natural composition, James Hardie fibre cement can withstand the effects of the weather in a wide variety of climates. For a permanently beautiful and durable facade.

Wood cladding may split, crack and deteriorate, season after season.

+ Low maintenance

The HardiePlank® range comes with ColourPlus™ Technology, a multi-coat, baked-on finish that is fade-resistant and does not require regular repainting.

As a result of fading, painted wood needs to be repainted every 5 years, and stained wood treated every 3 years.

HardiePlank® family

Wood

+ Fire resistant

HardiePlank® family will not ignite when exposed to direct flame or extreme heat; it is non-combustible with a fire classification of A2, s1 d0 - the highest possible fire rating for a coloured facade board.

Combustible material like wood burns easily and very quickly, producing significant amounts of heat and smoke.

HardiePlank® family

Wood

HardiePlank® family

Wood

+ Moisture resistant

Tried and tested, our boards offer long lasting protection and stand up beautifully, whatever the weather.

Humidity and precipitation may cause paint to crack and peel prematurely when using wood-based products as they expand and contract due to changes in climate conditions. Moisture may also cause rotting, swelling and shrinkage.

+ Pest resistant

HardiePlank® family is resistant to pests and rodents which can cause considerable damage to wooden facades.

Wood is vulnerable to mould and pest infestation. In the long run, the damaged wooden boards of the outer wall would have to be replaced.
